DETAILED ACTION

Drawings

1. The Examiner approves the formal drawings submitted on 3/24/2004.

Allowable Subject Matter

1. Claims 1-30 are allowed.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Francis A. Cooch on 31 October 2005.

3. The application has been amended as follows:

In claim 21, line 1, immediately before "computer program product for diagnosing...", "A" was deleted and

--A computer readable medium comprising a-- was inserted.

In claim 21, line 1, immediately after "...computer program...", "product" was deleted.

In claims 22-30, line 1, immediately after "The computer program", "product" was deleted.

Reasons for Allowance

4. The following is an examiner's statement of reasons for allowance:

Independent claims 1, 11, and 21 (claim 21 as amended above) recite a method and system for diagnosing pathologic heart conditions by identifying anomalously high wavelet coefficients, computed from time-frequency transformed heart sounds, using a constant false alarm rate (CFAR) detector. Said claims also recite steps and structure for computing vector-matrix calculations of said wavelet coefficients to determine a "click score" for comparison with a threshold level that distinguishes between normal heart and pathologic heart conditions. Prior art references failed to describe the claimed invention with stated features. In view of the shortcomings of the prior art, the Examiner deems independent claims 1, 11, and 21 and their depending claims to be allowable over the prior record.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hayek et al. (US Patent no. 6,898,459) discloses a system and method for diagnosing pathologic heart conditions in which a time series of heart sounds is filtered and parsed into a sequence of individual heart cycles. Akay et al. (US

Application/Control Number: 10/808,196 Page 4

Art Unit: 3766

Patent no. 5,638,823) discloses a system and method foe noninvasively detecting coronary artery disease by applying a wavelet transform to acoustic signal data to provide parameters to a feature vector.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian T. Gedeon whose telephone number is (571) 272 3447. The examiner can normally be reached on M-F 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert E. Pezzuto can be reached on (571) 272 6996. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
